Decision context

Stakeholder: Duka commercial lead

Decision: where to focus H2 inventory and marketing

Evidence: synthetic H1 2026 order data

Question: which mix of branch, product, month and channel deserves a measured test?

H1 KPI scorecard

Revenue KES 52,464,100

Orders 1,000

Average order value KES 52,464

Units 1,699

Monthly sales trend

Revenue by month (KES millions)

2026-01: 8.12 2026-02: 6.70 2026-03: 7.65 2026-04: 9.39 2026-05: 9.60 2026-06: 11.00

Branch performance

Revenue by branch (KES millions)

Mombasa: 8.18

Nakuru: 6.86

Nairobi: 6.78

Kisumu: 6.67

Westlands: 6.61

Nyeri: 6.56

Eldoret: 5.89

Thika: 4.93

Category mix

Revenue by category (KES millions)

Computing: 25.51

Television: 10.80

Mobile: 8.57

Wearables: 3.22

Audio: 2.23

Networking: 1.43

Accessories: 0.70

Channel basket comparison

Average order value (KES)

In-store: 51,110 across 645 orders

Online: 54,924 across 355 orders

Descriptive comparison only; not causal.

Weekday/weekend test

Weekend minus weekday average order revenue: KES -2,367

95% CI: KES -11,471 to 6,736

Welch t=-0.51, p=0.6097

Do not reject equal means at alpha=.05.

Recommendations and limits

Pilot stock and marketing allocation; track incremental gross margin and sell-through; compare with baseline/holdout before scaling.

Limits: synthetic data; no costs, promotions or stock-outs; no causal claims.
